Company Overview

Company Profile

- (1) Establish : September 13, 1985**
- (2) Registration : Neihu District, Taipei City**
- (3) Capital : NTD Thousand 890,851**
- (4) Staff (end till 2023.08.31) : 401**
- (5) Chairman : Tony Wang**
- (6) GM : Tony Wang**

Important company events

1985 The company was established in Taipei City, and initially focused on sales and services in the key online operating computer market.

1999 The stock is officially listed on the OTC.

2008 Merged the three companies of Daysun Technology, Zhongdian System and Super Network Technology.

2011 Passed the CMMI software maturity level 3 certification.

2012 (1) Chairman Tony Wang won the 2012 Information Month Outstanding Information Talent Award.

(2) Won the 9th National Brand Yushan Award "Outstanding Enterprise" commendation.

2015 Shortlisted for the 3rd Potential Enterprise List of Backbone Enterprises by the Industrial Bureau of the Ministry of Economic Affairs.

Important company events

- 2021 (1) Passed the certification of "Information Service Agency Service Energy Registration" by the Industrial Bureau of the Ministry of Economic Affairs.
- (2) Passed the "Energy Registration of Artificial Intelligence Technology Service Agency" certification by the Industrial Bureau of the Ministry of Economic Affairs.
- (3) Obtained invention patent Smart inspection system and smart inspection method.
- (4) Obtained invention patent Smart operation assistance system and intelligent operation assistance method.
- 2022 Obtained an order from the Ministry of Education for "Promoting Digital Learning Improvement Programs for Primary and Secondary Schools".

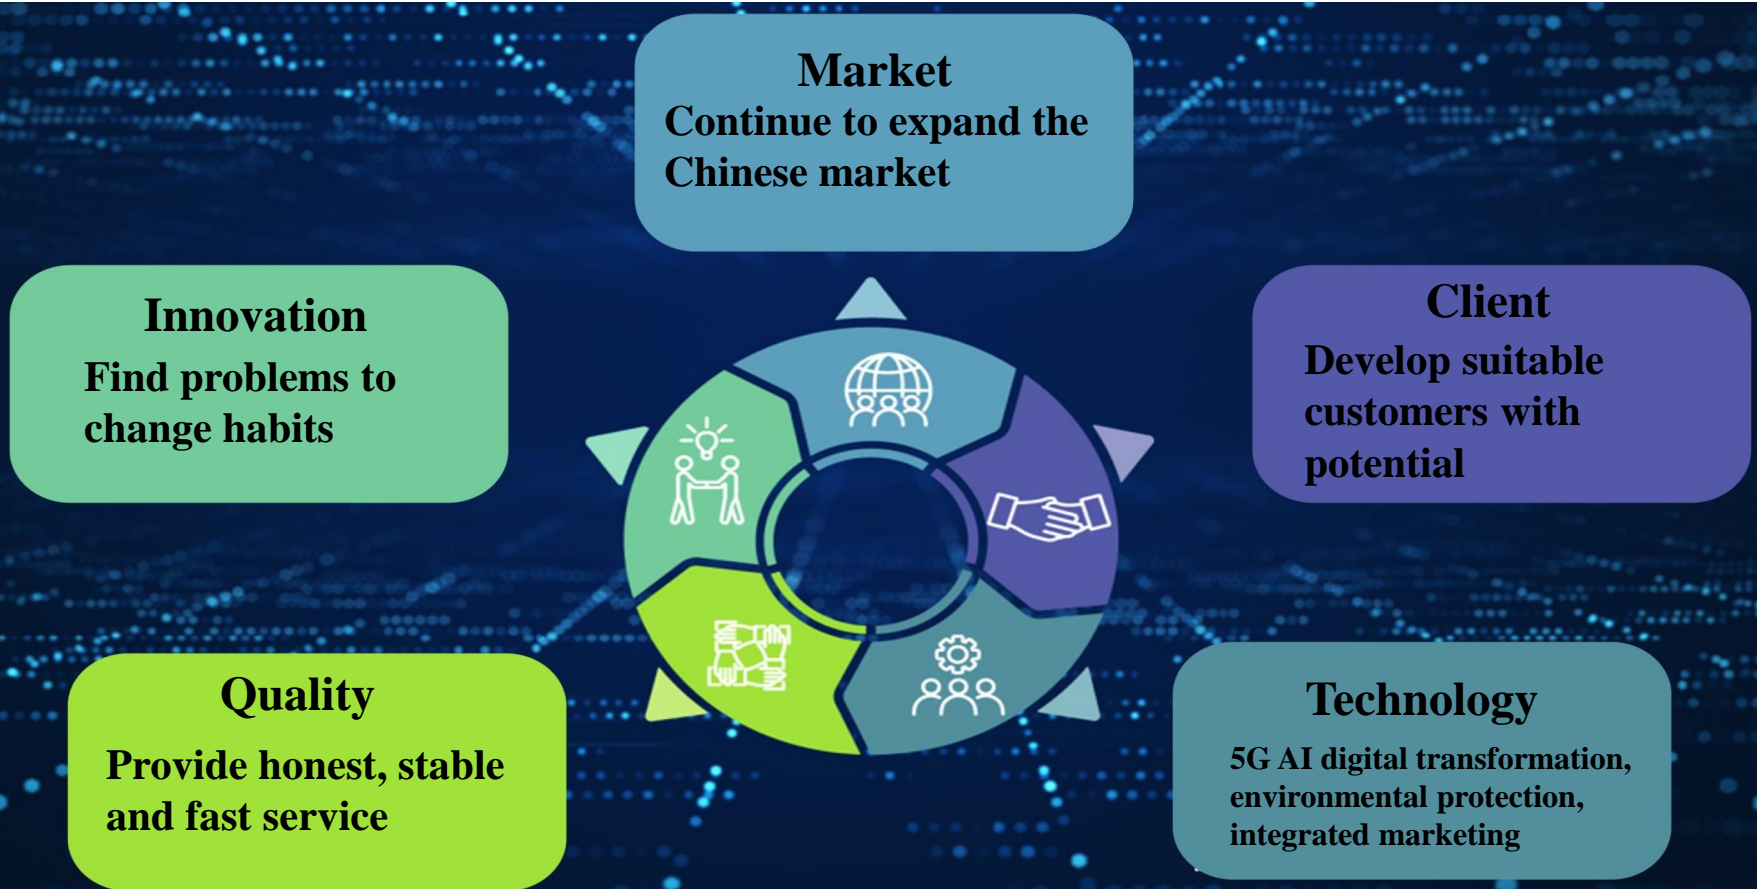

Main business content

LEO Systems Inc. is committed to customer information planning and construction services in various fields. Its customer base covers major industries and military, government, and educational institutions, providing high-quality products and technical support, and its service scope has expanded to all corners of the country. The company has system integration solutions for information, communication, finance, medical care, education, manufacturing, Internet and e-commerce services, through business development, marketing activities, product integration development, product agency distribution, strategic alliances, consulting, project management , information systems, education and training, overall system construction and other professional services, can better meet the information needs of customers, and can create or increase their industrial value for customers.

Head Office and Branches

- Head office: 3rd Floor, No. 298, Sunshine Street, Neihu District, Taipei City
- Taichung Branch: 8th Floor-7, No. 20, Dalong Road, Taichung City
- Kaohsiung Branch : 15F-2, No. 8, Mincuan 2nd Road, Kaohsiung
- There are service offices in Xindian, Linkou, Zhongli, Hsinchu, and Tainan.
- In addition, Shenzhen Yangzhong Technology Co., Ltd., which is reinvested, serves Taiwanese-related enterprises in mainland China.

Core expertise and competitiveness

LEO SYSTEMS,INC. Focus on collaborative technology, integration and management services, actively invest in information technology innovation, from three aspects to provide customers with a full range of information services.

Intelligent system integration service team

Provide a full range of system integration and value-added services for information and communication infrastructure products, and devote to assisting corporate customers in planning, construction, technical support, IT maintenance management, optimizing information processes and improving customers' industrial added value and innovation in information and communication (ICT).

Technology infrastructure construction, using 5G, AI, AIoT, system network, information security integration and smart medical care, to provide excellent information and communication integration services, assist customers in digital transformation, and win customer trust.

Digital financial marketing service team

Provide value-added integration services for various financial automation equipment (ATM, deposit machines), cash flow business integration and applications software solutions to optimize customer cash flow service needs, shorten customer service processes, and improve service efficiency and competitiveness.

At the same time, it develops AI smart manufacturing and preventive medicine ICT technology platforms with innovative integrated services of "information technology" and "integrated marketing", B2B international digital marketing services, and innovative technology projects to meet the different digital transformation needs of customers.

Professional information maintenance service team

Lottery betting machine, ATM and various IT equipment maintenance, with professional and flexible management capabilities, perfect SOP process control management, to provide customers with high-quality maintenance service support. °

Award Nomination Description and Certification Certificate

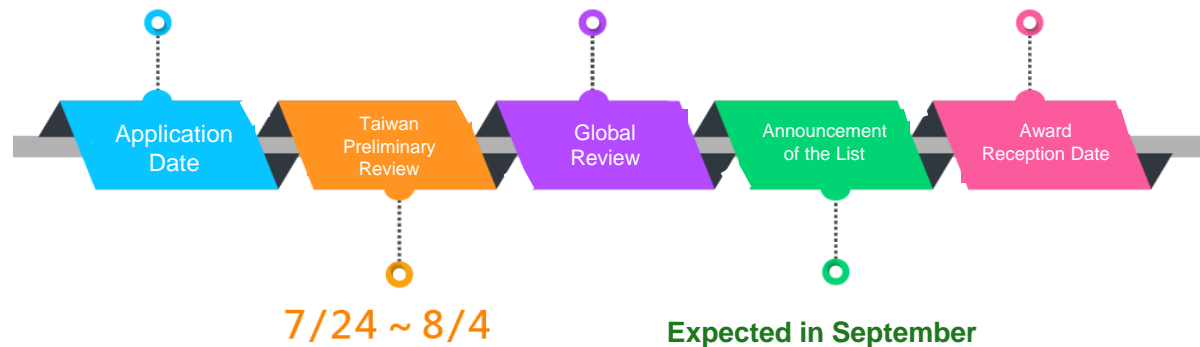

2023 International Information and Communication Technology (ICT) Award: WITSA ICT Excellence Award LEO SYSTEMS,INC. has successfully passed the Taiwan preliminary selection and advanced to the international final review.

2023 ICT Excellence Award

Starting from today ~ 7/21
17:00止 (GMT+8)

8/4 ~ 8/31

10/4 ~ 10/6

Award Nomination Description and Certification Certificate

LEO SYSTEMS, INC has been reviewed and approved by the Ministry of Digital Affairs and has obtained:

- AI人工智慧技術服務機構服務能量證書
- 資安能量登錄暨資通自主產品服務能量證書

Future outlook

Briefer : Chairman Tony Wang

Future outlook

- Deeply cultivate all-round information and communication infrastructure integration services.
- Continue to strengthen regional and mobile maintenance capabilities and management.
- Actively develop ESG sustainable smart AIoT system technology platform.
- Continue to develop 5G, AIoT factory automation solutions.
- Actively develop smart medical and nursing system integration solutions.
- Actively cultivate application software manpower and expand financial business application.

ESG Carbon Emissions Management Template for Medium to Large Enterprises

By merging 5G and the Industrial Internet of Things, the Carbon Inventory System records carbon emissions within the company, comprehends the carbon footprint, audits energy-intensive units, lowers emissions, and aids traditional manufacturing in enhancing ESG management. It also integrates with certifications and aligns with international supply chain standards.

Collaboration with Chung Yuan Christian University in the Chung Yuan Intelligent Manufacturing Center will be introduced to medium and large-sized enterprises, such as EVERLAST WIN ELECTRONICS CO., LTD., MUTUAL-PAK TECHNOLOGY CO., LTD., UNICE E-O SERVICES INC., and MTI in the third quarter of 2023, and will be expanded to various industrial areas in Taoyuan City.

Recent Progress in 5G AIoT Innovation by LEO Systems

- AI Inspection: Awarded the Ministry of Economic Affairs, R.O.C. A+ Enterprise Innovation and R&D Enhancement Program, Developing 5G AI Inspection Technology.
- >> LEOSYS's intelligent inspection system has been extended to large customers in the petrochemical, steel, and CPC Corporation industries. It has also passed the preliminary selection for the 2023 WITSA ICT Excellence Award, an international telecommunications and information technology award.
- AI Security: Kaohsiung Asia New Bay Area 5G AIoT Innovation Application Project - AI Manufacturing and Occupational Safety Technology.
- >> LEOSYS has developed AI Security Monitoring and occupational safety VR simulation training. The company has successfully implemented 5G smart security systems in precision manufacturing businesses in Kaohsiung and at the Formosa Plastics Renwu plant. The smart security technology will be further extended to various industrial fields to enhance factory safety.
- AI Carbon Reduction: Anticipatory Technology Development for Digital Service Innovation Subsidy Program - ESG Net Furnace Emission Reduction AI Process Optimization System.
- >> Leo Systems is developing AI-based processes for net furnace emission reduction. The company anticipates establishing its first successful case at Formosa Plastics Group's Mailiao plant in Yunlin in the first quarter of 2024.
- 5G Smart Video streaming ss District: Digital Development Department: Association-led 5G Vertical Application Pilot Project: Syntrend Smart Lifestyle 5G Video streaming District.
- >> Leo Systems, Inc. is leveraging group resources to develop technologies such as 5G live streaming and 5G cross-origin multimedia synchronization. It is expected to officially launch in the second quarter of 2024 at Syntrend.
